

FinCalc Pro v1.1 — Sprint Plan

Version: 1.1

Start Date: After v1.0 Play Store approval

Total Duration: 4 Sprints (4 weeks)

Goal: Transform from free calculator → monetized planning toolkit

Sprint Overview

Sprint	Duration	Focus	Deliverables
Sprint 1	Week 1	Premium Features (Core)	Loan Prepayment Simulator, Goal-Based Planner, Financial Health Score
Sprint 2	Week 2	Free Calculators (Growth)	SSY, Inflation, ELSS, SWP, RD, FD vs SIP, Cost of Delay, EMI Affordability
Sprint 3	Week 3	Monetization Infrastructure	AdMob, In-App Purchase, Firebase Analytics, Premium Nudge System, PDF Limit
Sprint 4	Week 4	Polish & Ship	Dark Mode, 10 PDF Exports, Rent Receipt, Share Cards, Notifications, Testing

Sprint 1 — Premium Features (Week 1)

Goal: Build the 3 features that justify Rs.99 premium unlock

Task 1.1 — Loan Prepayment / Bullet Payment Simulator

Priority: CRITICAL | **Effort:** 2 days | **Type:** Premium

Description:

The #1 reason users will pay Rs.99. Shows how prepaying a home/car loan saves interest and reduces tenure. No competitor does this well on mobile.

Inputs:

- Loan amount
- Interest rate
- Loan tenure (years)
- Prepayment amount
- Prepayment timing (one-time year OR recurring yearly/monthly)
- Prepayment frequency (one-time / yearly / monthly extra)

Outputs:

- Total interest WITHOUT prepayment
- Total interest WITH prepayment
- Interest saved (highlighted in green)
- Tenure reduced (e.g., "4 years 3 months saved")
- New EMI vs Original EMI
- Month-wise amortization comparison table
- Visual comparison bar (original vs prepaid)

Files to create:

- `lib/screens/prepayment_calculator.dart`
- `lib/services/prepayment_pdf.dart`

Acceptance Criteria:

- User can input loan details + prepayment details
- Shows interest saved and tenure reduced
- Supports one-time, yearly, and monthly prepayment modes
- PDF export works
- Premium lock gate (shows preview, asks to unlock)

Task 1.2 — Goal-Based Financial Planner

Priority: HIGH | **Effort:** 1.5 days | **Type:** Premium (basic free, detailed premium)

Description:

User sets life goals, app calculates required monthly SIP to reach each goal factoring inflation.

Inputs:

- Goal name (dropdown: House, Car, Child Education, Retirement, Wedding, Emergency Fund, Custom)
- Target amount (today's value)
- Time horizon (years)
- Expected return rate (default 12% for equity, 8% for debt)
- Inflation rate (default 6%)

Outputs:

- Inflation-adjusted target amount
- Required monthly SIP
- Required lump sum today
- Year-wise growth projection table
- Gap analysis: "You need Rs.X more per month"

Free tier: 1 goal only, basic result

Premium tier: Unlimited goals, detailed projection, milestone tracker

Files to create:

- `lib/screens/goal_planner.dart`

Acceptance Criteria:

- 7 preset goal types + custom
- Inflation adjustment works correctly
- Free users can create 1 goal
- Premium prompt appears for 2nd goal

Task 1.3 — Financial Health Score

Priority: HIGH | **Effort:** 1.5 days | **Type:** Premium (score free, details premium)

Description:

Gamified 0-100 score based on user's financial inputs. The viral + retention mechanic.

Inputs:

- Monthly income
- Monthly expenses
- Monthly EMI total
- Monthly investments (SIP/RD/PPF etc.)
- Emergency fund amount
- Insurance coverage (Yes/No for health + life)
- Tax-saving investments (80C utilized or not)

Scoring Formula:

Parameter	Max Score	Logic
Savings Rate	25	$(\text{Income} - \text{Expenses}) / \text{Income} * 100$
EMI-to-Income Ratio	20	Below 30% = full, 30-50% = partial, >50% = 0
Investment Rate	20	% of income invested monthly
Emergency Fund	15	≥ 6 months expenses = full
Insurance	10	Health + Life = full, one = half
Tax Optimization	10	80C fully utilized = full

Outputs:

- Score 0-100 with color indicator (Red/Orange/Green)
- Rating: Excellent (90+), Good (70-89), Needs Work (50-69), At Risk (<50)
- Top 3 improvement tips
- Shareable card: "My Financial Health Score is 82/100!"

Free tier: Score + rating only

Premium tier: Detailed breakdown, tips, improvement roadmap

Files to create:

- `lib/screens/health_score.dart`

Acceptance Criteria:

- All 6 parameters calculated correctly
 - Visual score gauge/circle
 - Share as image card
 - Premium gate on detailed breakdown
-

Task 1.4 — Save & Compare Scenarios

Priority: MEDIUM | **Effort:** 0.5 days | **Type:** Premium

Description:

Users can save any calculation result and compare two saved results side-by-side. Uses local storage (`shared_preferences`).

Files to create:

- `lib/services/scenario_storage.dart`
- `lib/screens/compare_screen.dart`

Acceptance Criteria:

- Save button on all calculator result screens
 - List of saved scenarios
 - Side-by-side comparison view
 - Premium gate (free users can save 1, premium unlimited)
-

Sprint 1 Deliverables Checklist

- Loan Prepayment Simulator — complete and tested
- Goal-Based Planner — complete and tested
- Financial Health Score — complete and tested
- Save & Compare — complete and tested
- All premium features show lock icon for free users

- Premium preview: users see partial results, then upgrade prompt
-

Sprint 2 — Free Calculators (Week 2)

Goal: Add 8 free calculators to make FinCalc Pro the most comprehensive free finance app

Task 2.1 — Sukanya Samriddhi Yojana (SSY) Calculator

Priority: HIGH | **Effort:** 0.5 days

Inputs: Girl's current age, yearly deposit amount, interest rate (default 8.2%)

Outputs: Total deposited (15 years), total interest earned, maturity amount at 21, year-wise table

Special: Show "Tax-free under 80C + EEE status" badge

File: `lib/screens/ssy_calculator.dart`

Task 2.2 — Inflation Calculator

Priority: HIGH | **Effort:** 0.5 days

Inputs: Current cost, inflation rate (default 6%), time period (years)

Outputs: Future cost, purchasing power erosion chart, "Rs.80L today = Rs.X in Y years"

File: `lib/screens/inflation_calculator.dart`

Task 2.3 — ELSS Calculator

Priority: MEDIUM | **Effort:** 0.5 days

Inputs: Monthly SIP amount, expected return (default 12%), investment period (min 3 years lock-in)

Outputs: Total invested, expected returns, maturity value, tax saved under 80C, comparison with FD

File: `lib/screens/elss_calculator.dart`

Task 2.4 — SWP Calculator (Systematic Withdrawal Plan)

Priority: MEDIUM | **Effort:** 0.5 days

Inputs: Initial corpus, monthly withdrawal, expected return rate, withdrawal period

Outputs: How long corpus lasts, remaining balance year-wise, total withdrawn vs total earned

File: `lib/screens/swp_calculator.dart`

Task 2.5 — RD Calculator (Recurring Deposit)

Priority: MEDIUM | **Effort:** 0.5 days

Inputs: Monthly deposit, interest rate, tenure (months)

Outputs: Total deposited, interest earned, maturity value, quarter-wise breakdown

File: `lib/screens/rd_calculator.dart`

Task 2.6 — FD vs SIP Comparison

Priority: HIGH | **Effort:** 0.5 days

Inputs: Investment amount, FD rate, SIP expected return, time period

Outputs: FD maturity vs SIP maturity, difference, crossover year, side-by-side comparison

File: `lib/screens/fd_vs_sip.dart`

Task 2.7 — Cost of Delay Calculator

Priority: HIGH | **Effort:** 0.5 days

Inputs: Monthly SIP amount, expected return, investment period, delay period (1-5 years)

Outputs: Without delay value, with delay value, opportunity cost (money lost by delaying), "Delaying 2 years costs you Rs.X"

File: `lib/screens/cost_of_delay.dart`

Task 2.8 — Expense vs EMI Affordability Calculator

Priority: MEDIUM | **Effort:** 0.5 days

Inputs: Monthly salary, monthly expenses, existing EMIs

Outputs: Disposable income, safe EMI (40% rule), max loan amount affordable, "You can afford a loan of Rs.X"

File: `lib/screens/affordability_calculator.dart`

Sprint 2 Deliverables Checklist

- SSY Calculator — complete and tested
 - Inflation Calculator — complete and tested
 - ELSS Calculator — complete and tested
 - SWP Calculator — complete and tested
 - RD Calculator — complete and tested
 - FD vs SIP Comparison — complete and tested
 - Cost of Delay Calculator — complete and tested
 - EMI Affordability Calculator — complete and tested
 - All 8 added to Home Screen with proper icons and categories
 - Navigation updated (new categories if needed)
 - Total calculators: 21 (13 old + 8 new)
-

Sprint 3 — Monetization Infrastructure (Week 3)

Goal: Wire up ads, payments, and analytics — start making money

Task 3.1 — Google AdMob Integration

Priority: CRITICAL | **Effort:** 1 day

Setup:

- Create AdMob account at admob.google.com
- Create ad unit IDs (banner)
- Add `google_mobile_ads` package to `pubspec.yaml`

Implementation:

- Banner ad widget (reusable component)
- Show on ALL calculator result screens
- Show on Home Screen (bottom)
- NEVER show during input
- NEVER use interstitial or video ads
- Hide ads for premium users

Files to create/modify:

- `lib/services/ad_service.dart` (singleton ad manager)
- `lib/widgets/banner_ad_widget.dart`
- Modify all result screens to include banner

Acceptance Criteria:

- Test ads showing on result screens
 - Ads hidden when premium purchased
 - No ads during input or navigation
 - Ad loads don't block UI
-

Task 3.2 — In-App Purchase (Rs.99 Premium)

Priority: CRITICAL | **Effort:** 1 day

Setup:

- Add `in_app_purchase` package
- Configure product in Google Play Console
- Product ID: `fincalc_pro_premium`
- Price: Rs.99 (one-time, non-consumable)

Implementation:

- Premium status stored in `shared_preferences`
- Purchase flow: tap "Unlock Premium" → Google Pay sheet → confirmation → unlock

- Restore purchases button in Settings
- Premium badge on home screen after purchase

What premium unlocks:

- Loan Prepayment Simulator (full access)
- Goal Planner (unlimited goals)
- Financial Health Score (detailed breakdown)
- Save & Compare (unlimited saves)
- Unlimited PDF exports
- All ads removed

Files to create/modify:

- `lib/services/purchase_service.dart` (singleton)
- `lib/services/premium_manager.dart` (check premium status)
- `lib/screens/premium_screen.dart` (showcase + buy)
- `lib/widgets/premium_gate.dart` (lock overlay)

Acceptance Criteria:

- Purchase flow works end-to-end
- Premium persists across app restarts
- Restore purchases works
- All premium features properly gated
- Ads disappear after purchase

Task 3.3 — Firebase Analytics

Priority: HIGH | **Effort:** 0.5 days

Setup:

- Create Firebase project
- Add `firebase_analytics` and `firebase_core` packages

- Download google-services.json

Events to track:

Event	When	Why
calculator_used	Any calculator opened	Know which calculators are popular
calculation_done	Result generated	Track completion rate
pdf_exported	PDF generated	Track PDF usage (for limit)
premium_prompt_shown	Upgrade nudge displayed	Track funnel
premium_purchased	Purchase complete	Track conversion
health_score_shared	Score shared	Track virality
app_opened	App launch	Track DAU/MAU

Files to create:

- lib/services/analytics_service.dart

Acceptance Criteria:

- All events firing correctly
- Firebase dashboard shows data
- No PII sent to Firebase

Task 3.4 — Premium Nudge System

Priority: HIGH | **Effort:** 0.5 days

5 Nudge Points:

#	Trigger	Message	Screen
1	Tax comparison shows savings	"Want to save even more? Unlock Smart Optimizer"	Tax Results
	3rd PDF export in a	"You've used 3/3 free exports. Go Premium for	

2	month	unlimited"	Any PDF
3	EMI result shows high interest	"Prepayment could save you Rs.X lakhs → Unlock Now"	EMI Result
4	Health Score below 70	"Get your detailed improvement plan → Upgrade"	Health Score
5	App used 14+ days	"You've been financially smart! Reward yourself → Premium"	Home Screen

Implementation:

- Track PDF count in shared_preferences (reset monthly)
- Track app open count and first install date
- Show bottom sheet with premium benefits + buy button
- "Maybe Later" option (never force)

Files to create:

- `lib/services/nudge_service.dart`
- `lib/widgets/premium_nudge_sheet.dart`

Acceptance Criteria:

- Each nudge triggers at correct moment
- Nudge doesn't show for premium users
- PDF counter resets monthly
- "Maybe Later" respects user choice (don't show same nudge for 3 days)

Task 3.5 — PDF Export Limit (Free = 3/month)

Priority: MEDIUM | **Effort:** 0.5 days

Implementation:

- Track PDF exports in shared_preferences with month key
- Free users: 3 PDFs per calendar month
- Show counter: "2/3 free exports remaining"

- When limit reached: show premium upgrade prompt
- Premium users: unlimited

Files to modify:

- `lib/services/pdf_service.dart` (add limit check)
-

Sprint 3 Deliverables Checklist

- AdMob banners showing on all result screens
 - Rs.99 purchase flow working
 - Premium status persisted and checked everywhere
 - Firebase Analytics tracking all key events
 - 5 nudge points wired and tested
 - PDF limit (3/month free) working
 - Premium screen with feature showcase
 - Restore purchases functional
-

Sprint 4 — Polish & Ship (Week 4)

Goal: Complete all remaining features, test everything, submit v1.1

Task 4.1 — Remaining 10 PDF Exports

Priority: HIGH | **Effort:** 1.5 days

Using existing `pdf_service.dart` template, create PDF reports for:

#	Calculator	PDF Content
1	HRA Exemption	3-way calculation, exempt amount, regime comparison
2	FD Calculator	Maturity value, quarter-wise interest, comparison
3	PPF Calculator	15-year projection table, tax savings
4	NPS Calculator	Corpus, pension, lump sum split, tax benefit

5	EPF Calculator	Yearly growth, employer+employee split
6	Gratuity	Calculation formula, covered/not covered
7	GST	CGST/SGST/IGST breakdown, invoice-ready
8	Salary	Full CTC to take-home breakdown
9	Lump Sum	Investment growth projection
10	SSY	21-year projection, tax benefits summary

Files to create:

- `lib/services/hra_pdf.dart`
- `lib/services/fd_pdf.dart`
- `lib/services/ppf_pdf.dart`
- `lib/services/nps_pdf.dart`
- `lib/services/epf_pdf.dart`
- `lib/services/gratuity_pdf.dart`
- `lib/services/gst_pdf.dart`
- `lib/services/salary_pdf.dart`
- `lib/services/lumpsum_pdf.dart`
- `lib/services/ssy_pdf.dart`

Task 4.2 — Dark Mode

Priority: MEDIUM | **Effort:** 0.5 days

Implementation:

- Add dark color palette to `lib/constants/colors.dart`
- Toggle in Settings screen (saved in `shared_preferences`)
- System default / Light / Dark options
- All screens respect theme

Files to modify:

- `lib/constants/colors.dart` (add dark palette)
 - `lib/main.dart` (`ThemeData.dark`)
 - Add `lib/screens/settings_screen.dart`
-

Task 4.3 — Rent Receipt Generator

Priority: HIGH | **Effort:** 0.5 days

Description:

Generate rent receipt PDFs for HRA claims. Users need this during tax filing.

Inputs:

- Tenant name, landlord name, landlord PAN (optional)
- Rent amount, rent period (from-to month)
- Property address

Output:

- Professional PDF rent receipt
- Month-wise receipts for the period
- Ready to submit for HRA claim

File: `lib/screens/rent_receipt.dart` , `lib/services/rent_receipt_pdf.dart`

Task 4.4 — Share Result as Image Card

Priority: MEDIUM | **Effort:** 0.5 days

Description:

Generate shareable image cards (like Instagram stories) from calculator results. Branded with FinCalc Pro logo.

Implementation:

- Use `screenshot` + `share_plus` packages
- Capture result widget as image

- Add FinCalc Pro branding footer
- Share to WhatsApp/Instagram/any app

File: `lib/services/share_card_service.dart`

Task 4.5 — Push Notifications (Tax Reminders)

Priority: LOW | **Effort:** 0.5 days

Implementation:

- Use `flutter_local_notifications` package
- Schedule reminders for key dates:

Date	Reminder
June 15	Advance Tax - Q1 due
July 31	ITR filing deadline
September 15	Advance Tax - Q2 due
December 15	Advance Tax - Q3 due
March 15	Advance Tax - Q4 due
March 25	PPF/NPS deposit before year-end
March 31	Tax-saving investments deadline

- User can enable/disable in Settings
- Notification opens relevant calculator

File: `lib/services/notification_service.dart`

Task 4.6 — Home Screen Update

Priority: HIGH | **Effort:** 0.5 days

Changes:

- Add 8 new calculators to home grid/list

- New categories: "Government Schemes" (SSY), "Planning Tools" (Goal Planner, Health Score)
 - Premium badge on premium features
 - Settings icon in header (dark mode, notifications, restore purchase)
 - Updated bottom navigation if needed
-

Task 4.7 — Testing & Bug Fixes

Priority: CRITICAL | **Effort:** 1 day

Test Checklist:

- All 21 calculators produce correct results
 - All 13 PDF exports generate correctly
 - Ads show for free users, hide for premium
 - Purchase flow works (use Google test cards)
 - PDF limit (3/month) enforced correctly
 - Premium nudges trigger at right moments
 - Dark mode works on all screens
 - Rent receipt generates correctly
 - Share cards generate and share
 - Notifications schedule correctly
 - No crashes, no overflow errors
 - Rs. symbol displays correctly everywhere
 - App works offline (except ads)
-

Task 4.8 — Play Store Update

Priority: CRITICAL | **Effort:** 0.5 days

To Do:

- Update version to 1.1.0 in pubspec.yaml

- Build new AAB via FlutLab/Codemagic
- Update Play Store listing:
 - New screenshots showing 21 calculators
 - Updated description with new features
 - "What's New" release notes
- Upload AAB to Play Console
- Submit for review

Release Notes:

v1.1 – Major Update!

- 8 NEW calculators: SSY, Inflation, ELSS, SWP, RD, FD vs SIP, Cost of Delay, Aff
- Loan Prepayment Simulator (Premium)
- Goal-Based Financial Planner (Premium)
- Financial Health Score (Premium)
- PDF export for ALL calculators
- Rent Receipt Generator
- Dark Mode
- Share results as image cards
- Tax deadline reminders
- Bug fixes and performance improvements

Sprint 4 Deliverables Checklist

- 10 new PDF exports working
- Dark mode toggle working
- Rent receipt generator working
- Share cards working
- Notifications scheduled
- Home screen updated with all 21 calculators
- All tests passed
- AAB built and uploaded
- Play Store listing updated

- v1.1 submitted for review

Complete v1.1 Summary

Numbers

Metric	v1.0	v1.1
Calculators	13	21 (+8)
PDF Exports	3	13 (+10)
Premium Features	0	6
Revenue Streams	0	2 (Ads + IAP)
Dart Files	~24	~45
Estimated Lines	~3,000	~6,500

New Dependencies (pubspec.yaml)

```
google_mobile_ads: ^5.1.0
in_app_purchase: ^3.2.0
firebase_core: ^3.6.0
firebase_analytics: ^11.3.3
shared_preferences: ^2.3.3
flutter_local_notifications: ^18.0.1
screenshot: ^3.0.0
```

New Files Count

Category	Files
New calculator screens	12
New PDF services	11
Monetization services	6
Widgets	3

Other screens	4
Total new files	~36

Revenue After v1.1

Source	Monthly (5K users)	Monthly (20K users)
AdMob	Rs.2,000-4,500	Rs.18,000-50,000
Premium (Rs.99)	Rs.5,000-10,000	Rs.30,000-60,000
Total	Rs.7,000-14,500	Rs.48,000-1,10,000

Ship v1.0 → Collect first users → Build v1.1 in 4 weeks → Start earning
